

PROSPECT RESEARCH & OUTREACH PACK

Top 100 Prospects for Pitch Decks, Presentation Design & Sales Collateral

A working directory of 100 organisations with a live, dated reason to buy presentation design - plus the playbook for turning that reason into a reply.

Prepared for	Fareed Zafar
Compiled	18 August 2026
Primary channel	LinkedIn, with email as the second touch
Scope	Pitch decks, presentation design, sales decks, brochures, one-pagers, flyers, data visualisation, sponsorship proposals
Contents	100 prospects across 7 segments 105 CRM rows 9-part playbook

The one principle everything here rests on

Every prospect is on this list because of a dated, public, verifiable event - a job posting, a funding round, a dropped sponsorship, a published prospectus. That event is your first line. **Never open with what you do. Open with what happened to them.**

What's in this pack

Part	Section	What you use it for
1	The Outreach Playbook	Segment strategy, message templates, follow-up cadence, pricing anchors, objection handling
2	The Prospect Directory	All 100 prospects grouped by segment, each with a dated trigger, what to sell and who to contact
3	Priority Worksheet	The contact-this-week shortlist, pulled out and ready to work

How the 100 break down

Segments are ordered by how little convincing each one requires, so your effort follows conversion likelihood rather than list order.

Seg	Segment	Count	Why they're on the list	Conversion
A	Active hiring signal	14	Posted a job for a presentation or proposal designer. Budget approved.	Highest
B	Agencies & studios for white-label work	21	Their product is decks. They subcontract overflow. Recurring.	Highest volume
C	Recently funded startups	31	Raised Jul-Aug 2026. Cash banked, sales motion starting.	Medium-high
D	VCs, accelerators & fund managers	10	Buy LP decks themselves and refer their whole portfolio.	Medium, huge upside
E	Events, conferences & associations	10	Publish a sponsorship prospectus every single year.	Medium
F	Sports & esports properties	9	Sponsorship decks are their revenue engine. Several just lost a partner programme.	Medium-high
G	Nonprofits & foundations	5	Annual and impact reports on a fixed annual cycle.	Medium
Total		100		

Read this before you send anything

- **Job postings expire.** Segment A triggers were live 10-18 August 2026. Re-check the posting is still up before referencing it. If it is filled, switch to the overflow angle.
- **No individual LinkedIn profile was verified.** Named people appear only where a public source names them. Everywhere else you get the job title to target - search that title plus the company and you will land on the right person.
- **Funding figures are as reported.** Amounts occasionally get restated. Never quote a number you have not re-read that morning.

- **Segment C moves fast.** A seed round announced in August is a hot lead in September and a cold one by December. Work it first.

PART 1 The Outreach Playbook

How to work the list so the reply you get is the one you expect.

1. The core principle

Every prospect here is attached to a dated, public, verifiable event. Leading with that event does three things at once: it proves you did homework, it explains why you are writing today, and it makes the message impossible to confuse with the fifty other "I design pitch decks" notes they got this week.

	Don't write this	Write this instead
A	"Hi, I'm a presentation designer with 6 years of experience..."	"Saw you posted a Presentation Designer role in Boston on the 12th - four days on-site is a tough ask for that skillset."
C	"I can help you with your pitch deck."	"Congrats on the \$8M from Square Peg. The first thing that usually breaks after a seed is the sales deck."
B	"Do you outsource design work?"	"You've got 5,000 decks shipped and a San Diego studio - do you keep a freelance bench for overflow weeks?"

2. Work the segments in this order

Effort follows conversion. Do not start at prospect 1 and grind to 100.

Timing	Segment	Why now
Week 1-2	B agencies, then A hiring signals	Nobody here needs selling on the category. Segment B especially: a bench placement sends you work for years without another cold message. Contact all 21 in Segment B in the first fortnight.
Week 3-4	D VCs & accelerators	Low volume, enormous leverage. You are not selling a fund a deck - you are asking to be the designer it recommends.
Week 5-8	C funded startups	High volume, medium conversion, fastest cash. Time-sensitive: hit them inside 6 weeks of the announcement.
Ongoing	E, F, G	Calendar-driven. Diary these rather than blitzing them - conferences buy 9-12 months ahead, nonprofits at fiscal year-end, sports before the season sales cycle.

3. What each segment actually buys

Match the offer to the segment or the reply rate collapses.

Seg	What they need	What NOT to lead with
A	Overflow capacity, peak-week support, template systems, the work the new hire can't get to yet	Don't pitch as a replacement for the role - the hiring manager will ignore you

Seg	What they need	What NOT to lead with
B	White-label production capacity, fast turnaround, working invisibly in their brand and process	Don't pitch strategy or narrative - that's their margin, you're threatening it
C	Sales deck, one-pager, investor-update template, conference collateral, data viz for new metrics	Don't pitch a pitch deck - they just finished raising
D	LP decks for the fund itself, portfolio deck support, demo-day templates	Don't ask for a referral in message one
E	Sponsorship prospectus, exhibitor brochure, floorplan graphics, post-event impact report	Don't pitch in the 6 weeks before their event - nobody is listening
F	Sponsorship sales decks, partnership one-pagers, audience data viz, renewal recap decks	Don't pitch generic brand design - they buy revenue collateral
G	Annual report, impact report, case for support, donor and board decks, data viz	Don't lead on price - lead on donor trust and clarity

The single most important nuance

A company that just closed a round does not want a pitch deck. It wants the collateral that turns money into revenue - sales decks, one-pagers, data visualisation. Pitch-deck work comes from companies **12-18 months post-raise** or **currently raising**. Get this backwards and Segment C will not reply.

4. Message templates

4.1 LinkedIn connection note

Maximum 300 characters - that is the hard constraint. Trigger, one specific observation, no ask.

Segment A	<i>"Saw the Presentation Designer opening in Boston. Pursuit decks under an RFP deadline are a different animal from marketing slides - happy to be a backstop for peak weeks while you hire. No pitch, just leaving it here."</i>
Segment B	<i>"5,000+ decks and a San Diego studio - that's serious throughput. Do you run a freelance bench for overflow? I do production-grade PowerPoint in someone else's brand system without needing hand-holding."</i>
Segment C	<i>"Congrats on the seed. Usually the week after a raise is when someone notices the sales deck is still the fundraising deck with the ask slide deleted. If that's on your list, I'm around."</i>
Segment D	<i>"Pre-seed founders lose more deals to a confusing deck than a weak business. I'd happily do a free teardown on one portfolio deck - useful to you either way, no strings."</i>
Segment F	<i>"Noticed you're out of the 2026 partner programme. Rebuilding a sponsorship story for non-endemic brands is exactly the deck problem I like. Worth a look at your current sales deck?"</i>

4.2 Email - first touch

Four sentences. No attachments. One link.

Subject: <specific trigger, no adjectives>

Hi <name>,

<Trigger - one sentence, dated, factual.>

<One sentence of insight that shows you understand their situation, not your service.>

<What you'd do - concrete, scoped, small.>

Portfolio: <link>. Worth 15 minutes?

Fareed

Worked example - Segment C, using prospect 53

Subject: Congrats on the \$8M - one thought on what comes next

Hi Luke,

Saw Reservoir closed \$8M on the 12th, led by Asymmetric.

The Boston-metro expansion means your install crews and utility partners will need something to leave behind, and a homeowner-facing one-pager is a very different document from the deck that raised the round.

I'd start with two things: a partner/utility deck and a single-page installer leave-behind, in your existing brand. Fixed price, about a week.

Portfolio: <link>. Worth 15 minutes?

Fareed

4.3 Follow-up cadence

Touch	Day	Channel	Content
1	0	LinkedIn connect + note	Trigger, no ask
2	+3	Email	Full first touch (4.2 above)
3	+8	LinkedIn DM, if connected	One piece of specific value - e.g. a redesigned slide from their public deck
4	+17	Email	One line: "Still worth a look, or should I close the loop?"
5	+45	Email	New trigger only. If there is no new trigger, don't send.

Stop at five. Then move them to a quarterly re-trigger list. Follow-ups are not new outreach - budget separate time for them or the cadence silently collapses.

5. The move that converts best

For Segments C, F and G: do the work first, uninvited, and small.

Find one slide of theirs that is publicly available - a deck on their site, a conference talk, a sponsorship page, an annual report spread - rebuild **one** slide, and send it as an image in message 3. Not a full deck. One slide.

Why it works

It costs 25 minutes and converts several times better than any written pitch, because it moves the conversation from "can you design?" to "can you do this for the other 19 slides?" - a scoping question, not a trust question.

6. Pricing anchors

Use these to sanity-check what you quote. You are competing against these numbers, not against nothing.

Benchmark	Rate	Source context
US in-house presentation designer	\$42.86/hr average (\$31.97-\$45.43)	ZipRecruiter, Aug 2026
Suffolk - salaried Presentation Designer, Boston	\$78,000-\$106,000/yr	Job posting, Aug 2026
Allied Sports - Presentation & Brand Designer, NYC	\$75,000-\$85,000/yr	Job posting, Aug 2026
Freelance presentation designer, open market	\$24-\$240/hr	ZipRecruiter listings, Aug 2026
Nonprofit graphic designer	\$26.90/hr average (\$19.95-\$31.25)	ZipRecruiter, Aug 2026
ManyPixels - dedicated designer	from \$1,299/mo	Vendor pricing, 2026
Design Pickle	~\$1,918/mo min + \$119-299 platform	Vendor pricing, 2026

Benchmark	Rate	Source context
Superside - enterprise	~\$5,000/mo	Vendor pricing, 2026

What this tells you

- A salaried in-house designer costs an employer roughly **\$6,500-\$8,800 a month** all-in before overhead. Any retainer below that is defensible on pure economics - say so explicitly to Segment A.
- The subscription studios have set the market's mental anchor at **\$1,300-\$5,000 a month for a designer on tap**. Price a retainer inside that band and you land in a familiar, pre-approved-feeling range.
- Never quote hourly to Segment B agencies. They resell your time - quote **per slide or per deck** so their margin maths is easy.

7. Qualifying - who to drop fast

- They ask for spec work - a free sample deck for their actual project - before any call.
- They want unlimited revisions without a scope document.
- The budget conversation gets deferred twice.
- **Segment C only:** they raised pre-seed under roughly \$500k. There is usually no design budget yet - put them on the 12-month re-trigger list instead of writing them off.

8. Objection handling

They say	You say
"We have someone in-house."	"Perfect - I'm not trying to replace them. I'm the person they call in the week three decks are due at once." Especially true for Segment A.
"We use Canva / an AI tool now."	"Those are great for volume. They're weak on the one deck that decides an outcome - the board deck, the investor deck, the pitch you can't lose."
"Send us your rates."	Don't send a rate card cold. "Rates depend on slide count and whether narrative is in scope - give me the deck and deadline and I'll price it in an hour."
"Too expensive."	Anchor to the in-house cost in section 6, or reduce scope - never rate. Cutting your rate teaches them your first number was fiction.
"Not right now."	"Understood. When's your next raise / conference / annual report?" Then diary it. That is a warm lead in four months, not a dead one.

9. Weekly working rhythm

- **20 new prospects contacted per week** (message 1 only). The list is 100, so five weeks of new outreach.
- **Follow-ups are not new outreach.** Budget separate time or the cadence in 4.3 collapses.
- **Re-verify every trigger the morning you send it.** A closed job posting or a restated funding number is the fastest way to lose credibility in one sentence.
- **Log every reply, including no.** A "no, not now" with a date attached is the most valuable row in your CRM.

PART 2 The Prospect Directory

All 100 prospects, grouped by segment. Every row carries a dated buying trigger, what to sell, and the job title to search on LinkedIn.

Reading the table

Contact is the job title to search on LinkedIn alongside the company name - named individuals appear only where a public source names them. **P** is priority: **HIGH** contact this week, **MED** contact this month, **LOW** diary it. Rows numbered 76b, 93b and so on are grouped organisations that share one identical trigger and one identical pitch, expanded here for CRM use - which is why the directory runs to 105 rows for 100 prospects.

A

Active hiring signal

14 prospects | 14 directory rows

Why they're here

Each of these organisations posted a job for someone to make presentations, proposals or pursuit graphics. The need is proven, the budget line exists, and nobody has to be convinced the work is worth paying for. You compete on who, not whether.

How to pitch them

Do NOT position yourself as an alternative to the hire - the hiring manager owns that requisition and reads it as a threat. Position as overflow and peak-week capacity. If the role has since been filled the angle gets stronger, not weaker: the new hire is drowning in month one.

#	Prospect	Buying trigger	What to sell	Contact	Channel	P
1	Suffolk (Suffolk Construction) Construction (~\$9B rev; 3000 staff; 17 offices) / Boston, MA	Posted Presentation Designer role; on-site 4 days/wk; \$78k-\$106k Aug 2026 Brief says "elevate content not just format slides"	RFP & pursuit decks; bid presentations; PPT template system	Creative Director / Marketing Director / Proposal Manager	LinkedIn + Email	HIGH

B

Agencies & studios for white-label work

21 prospects | 21 directory rows

Why they're here

These businesses sell decks. Their constraint is production capacity, not demand. They already brief external designers, they already have clients, and they pay without you educating anyone. One agency that adds you to its bench replaces months of cold outreach.

How to pitch them

Lead with capacity, reliability and brand discipline - your ability to work inside their templates, their client's brand and their deadlines, invisibly. Never pitch narrative or strategy: that is the margin they sell. Price per slide or per deck, never hourly.

#	Prospect	Buying trigger	What to sell	Contact	Channel	P
15	SlideGenius Presentation design agency (5000+ pitch decks) / San Diego, CA	Publicly hiring PowerPoint designers; explicitly open to remote 2026 WARMEST DOOR IN SEGMENT	White-label deck production	Creative Director / Talent	Email resumes@slidegenius.com	HIGH
16	Buffalo7 Presentation specialists (Facebook / UEFA Champions League / BBC) / Manchester, UK	Enterprise deck work at volume; UK timezone 2026	White-label deck production	Design Director / Studio Manager	LinkedIn	HIGH
17	24Slides Presentation design company / Denmark + Indonesia	Built on distributed production; structurally absorbs external designers 2026	White-label deck production	Production Lead	LinkedIn + Email	HIGH

C

Recently funded startups

31 prospects | 31 directory rows

Why they're here
Raised July-August 2026. Cash in the bank, sales motion starting, and a board that now expects a monthly update deck with real data in it.

How to pitch them
A company that just closed a round does NOT need a pitch deck - they finished that job. Sell what breaks after a raise: sales decks, one-pagers, investor-update templates, conference collateral, data visualisation. Contact within 6 weeks. Save the pitch-deck angle for the 12-18 month re-trigger.

#	Prospect	Buying trigger	What to sell	Contact	Channel	P
36	Bespoke Labs Environments to train/evaluate long-horizon AI agents / San Francisco, CA	\$40M Series A led by Wing VC 6 Jul 2026 Seed led by 8VC	Technical sales decks; developer one-pagers; benchmark data viz	Alex Dimakis / Mahesh Sathiamoorthy (co-founders)	LinkedIn	HIGH
37	Paper Design platform for agentic AI / San Francisco, CA	\$34M Series A co-led by Accel and Iconiq Jul 2026 Design company - lead with craft	Product launch decks; brand collateral	Head of Marketing	LinkedIn	MED

66	Kinematic Trees Robotics intelligence platform / UK	GBP 585K Pre-seed 29 Jul 2026 Small raise = fundraising again soon; PITCH DECK angle works here	Seed pitch deck	Founder	LinkedIn	MED

D

VCs, accelerators & fund managers

10 prospects | 11 directory rows

Why they're here

Two revenue lines from one contact. The firm needs LP decks and demo-day templates; more importantly a pre-seed partner speaks to dozens of founders a month and every one of them needs a deck.

How to pitch them

Never ask for a referral in message one - it reads as extractive. Lead by giving: offer a free teardown of one portfolio company's public deck. Useful to them either way, and it demonstrates judgement rather than claiming it.

#	Prospect	Buying trigger	What to sell	Contact	Channel	P

E

Events, conferences & associations

10 prospects | 10 directory rows

Why they're here

Every one of these publishes a sponsorship prospectus and exhibitor brochure every year, because that document is how the event gets funded. Recurring, calendar-driven, already budgeted.

How to pitch them

The 2027 prospectus is commissioned 9-12 months before the event - for most of these, now through Q4 2026. Never pitch in the six weeks before an event. Also sell the back end: the post-event sponsor recap deck that decides whether sponsors renew.

F

Sports & esports properties

9 prospects | 13 directory rows

Why they're here

The Esports World Cup's Club Partner Programme - \$20M a year, six-figure base per club - dropped several major organisations for its 2026 edition. Those clubs just lost a guaranteed revenue line and must replace it with commercial sponsorship.

How to pitch them

Sell revenue documents: sponsorship sales decks, partnership one-pagers, audience and engagement data visualisation, renewal recap decks. Do not pitch generic brand design. Clubs newly added to the programme need activation collateral right now.

G

Nonprofits & foundations

5 prospects | 5 directory rows

Why they're here

Annual and impact reports run on a fixed cycle, and the sector has an acknowledged quality problem: nearly four in five nonprofits use an impact report to fundraise, but only 16% say it is very effective.

How to pitch them

That 16% statistic is your entire pitch - quote it verbatim. Pitch foundations and large national organisations, not small local ones: nonprofit design averages \$26.90/hr against \$42.86/hr in the wider market. Scope by project, never hourly.

#	Prospect	Buying trigger	What to sell	Contact	Channel	P
96	The Rockefeller Foundation Global foundation / New York, NY	One year into a five-year \$1B strategy - annual progress reporting obligation 2026 Energy/food/health/finance/economic opportunity	Impact reports; strategy progress data viz; convening decks	Director of Communications / Creative Director	LinkedIn + Email	MED

Where to start on Monday

SlideGenius (row 15) is the single warmest door on the list - publicly hiring PowerPoint designers, explicitly open to remote candidates, applications to resumes@slidegenius.com. It is the one prospect here you can approach through a stated, open front door rather than cold. Send that one first.

PART 4 The 27 Messages

One tailored message set per high-priority prospect, in send order: agencies first, then hiring signals, funded startups, accelerators, events and esports.

Reading each entry

Reach is where to find them - verified emails and pages where they exist, otherwise a LinkedIn people-search that runs the query for you. **Pain** is the one thing actually broken for them; everything in the message serves it. **Note** is the LinkedIn connection request, hard-capped at 300 characters. **Follow-up** goes on day +3, as email or DM.

Two rules that decide whether these work

Never invent urgency. Every deadline below is their calendar - a demo day, a conference date, a sponsorship cycle. Adding fake scarcity marks you as someone with no work. **Never offer a pitch deck to Segment C.** They just finished raising; that job is done for 12-18 months. Sell what breaks after the round.

15 · SlideGenius

Reach resumes@slidegenius.com, which is their own stated route for designers · Company page · San Diego · Ask for the Creative Director

THE PAIN

Five thousand decks out the door is a traffic problem wearing a design problem's clothes. The weeks that hurt aren't the quiet ones. They're the Thursdays when three enterprise decks land at once and everyone is already buried.

LINKEDIN NOTE (224 / 300 characters)

"You're hiring PowerPoint designers and you'll take remote. Which usually means the queue is winning. I'm the freelance version of that hire. Your templates, your client's brand, no hand holding. Give me one deck to prove it?"

FOLLOW-UP (day +3, email or DM)

Hi [name],

Five thousand decks. That's not a design problem, that's a traffic problem.

And I'd bet the weeks that actually hurt aren't the slow ones. They're the Thursdays when three enterprise decks land together and every designer is already spoken for.

I'm not after anyone's job. I'm the person you call on that Thursday.

I've spent years working inside other people's templates and other people's brand rules, so nobody has to teach me either one. And you won't get files back that need a second pass, which I know is the real fear with freelancers.

[link]

Throw me one live deck. If it isn't clean, you've lost a day and I've lost the argument.

16 • Buffalo 7

Reach buffalo7.co.uk/join-us/ · Company page · Manchester · Ask for the Design Director

THE PAIN

With Facebook, UEFA and the BBC on the other side of the table, nobody notices the forty seven good slides. They notice the one that's slightly off. Easy standard to hold most weeks. Not the week three projects collide.

LINKEDIN NOTE (229 / 300 characters)

"Facebook, UEFA, the BBC. Clients where one wonky slide is the only thing anyone remembers. Easy bar to hold on a normal week. Less easy when three projects land together. That's the week I'm useful. Do you keep a freelance bench?"

FOLLOW-UP (day +3, email or DM)

Hi [name],

Your client list does something unusual. It deletes your margin for error.

When UEFA is on the other side of the table, nobody notices the forty seven good slides. They notice the one that's slightly off.

Holding that standard is fine most weeks. It gets ugly the week three projects collide and the honest choice is late or sloppy.

I'd like to be the third option.

I don't turn up with my own taste and try to sell it to you. I work to whatever system you've already built, and I've made decks for exactly that kind of room.

[link]

One paid test and you'll know by the end of the day.

17 · 24Slides

Reach 24slides.com · LinkedIn search · Denmark and Indonesia · Ask for the Production Lead

THE PAIN

Two hundred designers across two continents solves capacity. It doesn't solve the deck that technically shipped and then landed back on someone's desk needing a rebuild. And it's never the routine one.

LINKEDIN NOTE (212 / 300 characters)

"200 designers across two continents solves capacity. It doesn't solve the one deck that comes back needing a rebuild, and it's always the important one. I'd like to be where those get sent. Any room on the bench?"

FOLLOW-UP (day +3, email or DM)

Hi [name],

Distributed design solves capacity. It doesn't quite solve variance.

You know the one I mean. The deck that technically shipped, then came back needing to be rebuilt. And it's never the routine job. It's the client's board deck, or the investor deck, or the one holding up the account.

I'd like to be where those get routed.

Senior, works inside your process instead of around it, sends back files nobody has to fix.

[link]

Start me on one and let it argue for itself.

18 · Ink Narrates

Reach inknarrates.com · Company page · Mumbai · Ask for the founder

THE PAIN

They've built a business being someone else's design team, which grows exactly as fast as they can find people who are already good. Juniors you can train. Seniors you have to go looking for, and the good ones are busy.

LINKEDIN NOTE (221 / 300 characters)

"Outsourced deck design is your actual product, so demand isn't your ceiling. Finding seniors who are already good is. I'd like to be one you don't have to train. Investor and sales decks, in your system, right first time."

FOLLOW-UP (day +3, email or DM)

Hi [name],

You've built a business being somebody else's design team. Good business. One annoying constraint.

It grows exactly as fast as you can find people who are already good.

Juniors you can hire and shape. Seniors you have to go hunting for, and the decent ones are usually busy.

I do investor and sales decks at that level. I work inside an agency's system rather than fighting it, and I've never needed a brief explained twice.

[link]

One project. Then you decide whether there's a second.

19 · Superside

Reach careers.superside.com/jobs/creative-presentation-design, a live opening · Remote · Ask for Talent or Creative Ops

THE PAIN

An open presentation design role sitting next to 450 brands means demand got ahead of supply. And the hard part of enterprise deck work isn't creativity. It's restraint.

LINKEDIN NOTE (219 / 300 characters)

"You've a presentation design role open and 450 brands to look after. That maths doesn't usually resolve with one hire. I do enterprise brand systems, remotely, at that standard. Worth a chat while the role's still open?"

FOLLOW-UP (day +3, email or DM)

Hi [name],

An open presentation design role sitting next to 450 brands tells me demand got ahead of supply. Nice problem. Still a problem.

The hard part of enterprise deck work isn't creativity. It's restraint. Staying inside a brand system somebody else built, across time zones, with nobody around to catch the moment you decide your idea is better than theirs.

That's the bit I'm good at.

[link]

Happy to go through your normal process rather than round the side of it.

1 · Suffolk

Reach LinkedIn search · Boston · Creative Director, Marketing Director or Proposal Manager

THE PAIN

The ad asks for someone who can think and structure content, not just format slides. Right ask, and exactly why it'll sit open for months. Four days on site in Boston shrinks the pool further. Pursuit deadlines don't care.

LINKEDIN NOTE (228 / 300 characters)

"Saw the Presentation Designer role. Four days on site in Boston, for work that spikes whenever a pursuit deadline lands. Small pool, big problem. I can cover the spikes remotely until you fill it. No pitch, just leaving my card."

FOLLOW-UP (day +3, email or DM)

Hi [name],

Your ad says you want someone to think and structure content, not just format slides.

Good ad. Also the reason it'll sit open for months. People who can do that are rare, and asking them for four days a week on site in Boston makes them rarer.

Meanwhile the pursuits keep coming. Seventeen offices means a deadline most weeks, and the ones that really hurt are when two big ones land together.

That's where I'd be useful. Remote, quick, and used to turning dense technical content into something a selection panel can follow while half of them are checking their phones.

I'm not applying. I'm cover until your person starts, and overflow after they do.

[link]

2 • Allied Sports

Reach alliedsports.com/careers · Company page · New York · Creative Director or VP Partnership Marketing

THE PAIN

"Sponsor to Storyteller" puts the whole bet on the story, and the deck is the only thing in the room actually doing the storytelling. New business doesn't arrive on a schedule and won't wait for a hire.

LINKEDIN NOTE (222 / 300 characters)

"Sponsor to Storyteller" puts the whole bet on the story. Which makes the deck the thing that wins or loses it. You're hiring for that seat, but pitches don't wait for hiring. I can cover the ones you can't afford to lose.

FOLLOW-UP (day +3, email or DM)

Hi [name],

If your promise is turning sponsors into storytellers, the deck has to carry that. It's the only thing in the room actually doing the storytelling.

You're hiring a Presentation and Brand Designer to own it, which makes sense. But new business doesn't arrive on a schedule, and the pitches that show up between now and your new hire's start date are the ones that shape the year.

I build sponsorship and partnership decks. The kind where a brand marketer has to see their own campaign inside your idea by slide three or you've lost them.

[link]

Give me one pitch and let it speak for itself.

3 • Oracle

Reach LinkedIn search · Denver and remote · Director, Consumer Insights and Analytics

THE PAIN

Two presentation openings on the insights side says the analysis is arriving faster than anyone can present it. Their own brief mentions scalable template systems, which is the part everyone underestimates.

LINKEDIN NOTE (232 / 300 characters)

"Your brief mentions scalable PowerPoint template systems, which everyone underestimates. A template either survives its first hundred users or quietly falls to bits. Most fall to bits. That's the job I'd actually want. Free to chat?"

FOLLOW-UP (day +3, email or DM)

Hi [name],

Two presentation openings on the insights side. Feels like the analysis is arriving faster than anyone can present it.

The line in your brief about scalable template systems is the one that caught me though.

Most decks don't fail at the design stage. They fail six months later, once a hundred people have been using the template and it's quietly come apart. Someone's dragged a logo two pixels. Someone's picked a blue that isn't in the palette. Nobody can find the right chart layout so they've built their own.

Making one that survives that is a completely different skill from making slides look nice. It's also the more interesting problem.

[link]

4 • Momentum Worldwide

Reach LinkedIn search · New York · Creative Director or Head of New Business

THE PAIN

The idea is almost never what loses. What loses is the deck getting made at 11pm by people who spent the day running live accounts, and clients don't mark you against how busy you were.

LINKEDIN NOTE (221 / 300 characters)

"In experiential the idea is rarely what loses. What loses is the deck getting built at 11pm by people already running live accounts. Clients don't mark you on effort. I do pitch overflow. Say the word before the next one."

FOLLOW-UP (day +3, email or DM)

Hi [name],

In this business the idea is almost never the thing that loses.

What loses is that the pitch deck got made at 11pm by the same people who spent the day running live accounts. You can see it in the deck. So can the client.

And they're not marking you against how busy you were. They're marking you against the agency that happened to have a quiet week.

I do new business decks as overflow. You keep the thinking. I make sure it survives the trip to the room.

[link]

One pitch is enough to tell whether it helps.

5 • Prophet

Reach LinkedIn search · SF, NYC, Chicago, London · Design Director or Studio Manager

THE PAIN

Clients can't see the thinking, only the document. So how good the slide looks becomes how good the strategy seems, and the slide usually gets made by a strategist at 2am.

LINKEDIN NOTE (213 / 300 characters)

"Clients never see the thinking. They see the document. So slide quality quietly becomes strategy quality, which is a rough deal when the slide got made by a strategist at 2am. I can take that layer off your hands."

FOLLOW-UP (day +3, email or DM)

Hi [name],

Consulting has an unfair rule baked into it.

The client can't see the thinking. They can only see the document. So how good the slide looks becomes how good the strategy seems.

Rough deal, particularly when the person making that slide is a strategist doing it at 2am because there was nobody else left in the building.

I take that layer off. Inside your templates, at your standard, so the recommendation lands the way it should have in the first place.

[link]

36 · Bespoke Labs

Reach Co-founders Alex Dimakis and Mahesh Sathiamoorthy · LinkedIn search · San Francisco · \$40M Series A, 6 July 2026, led by Wing VC

THE PAIN

The deck that raised the round is about to be asked to sell, and the two audiences want opposite things. Investors buy what might happen. ML engineers want the numbers and to be left alone. Their numbers are benchmarks, which is exactly where technical decks fall apart.

LINKEDIN NOTE (213 / 300 characters)

"Congrats on the \$40M. Now the deck that raised it has to go and sell, and those two audiences want opposite things. Investors bought the future. ML teams just want the numbers. Want me to look at what's going out?"

FOLLOW-UP (day +3, email or DM)

Hi Alex, hi Mahesh,

Congratulations on the \$40M with Wing.

There's a thing that happens after a Series A that I see constantly. Somebody deletes the ask slide off the fundraising deck and it quietly becomes the sales deck. It almost never works, because the two audiences want opposite things. Investors are buying what might happen. ML engineers want to see the numbers and then be left alone.

For what you're building, the numbers are the benchmarks. And benchmark slides are where most technical decks fall over. Too much data, no argument, and the one result that matters sitting in row four.

That's the bit I'd fix first. Small job, fixed price, nothing owed after it.

[link]

38 · Maximum

Reach CEO Randy Fernando · LinkedIn search · Miami · \$30M Seed, 3 August 2026, led by CRV

THE PAIN

Banks aren't asking whether the product is better. They're asking what happens to them personally if it goes wrong. That makes the sales deck a risk document, and most startup decks bury exactly that at the back in small type.

LINKEDIN NOTE (218 / 300 characters)

"\$30M to rip out bank cores. Congratulations, and good luck, because your buyer is the most cautious human in financial services and reads decks hunting for the reason this becomes their fault. Want yours stress tested?"

FOLLOW-UP (day +3, email or DM)

Hi Randy,

Congratulations on the \$30M with CRV, and on doing this a third time.

You'll know the bit that makes banks different better than I do. They're not really asking whether your product is better. They're asking what happens to them personally if it goes wrong.

Which turns your sales deck into a risk document. Security, compliance and migration have to be settled before anyone will look at the roadmap with a straight face.

Most startup decks put all of that at the back in small type, if at all. I'd move it to the front and make it the reason to trust you rather than the fine print.

Reach LinkedIn search · UK and Israel · \$9M Series A+, 10 August 2026

THE PAIN

Retail proof reads to a buyer in another sector as evidence you were built for retail and they'll be the awkward experiment. Nobody says that out loud. They just go quiet.

LINKEDIN NOTE (230 / 300 characters)

"\$9M to take edge AI past retail. Congrats. The tech travels fine. The deck usually doesn't. Retail case studies read to a new sector as proof you were built for somebody else. Better fixed before the first ten meetings than after."

FOLLOW-UP (day +3, email or DM)

Hi [name],

Congratulations on the \$9M.

Moving into a new industry is a story problem before it's a product problem.

Your retail proof is real. But a buyer in a different sector reads retail case studies as evidence you were built for retail, and that they'll be the awkward experiment. Nobody ever says that out loud. They just go quiet.

You don't need a deck per industry, which becomes a maintenance nightmare by industry four. You need one structure where the proof stays put and the framing moves.

Two weeks of work, and a lot cheaper now than after ten meetings have gone cold.

Reach CEO Ben Armstrong · LinkedIn search · Manchester · \$7M Series A, 12 August 2026, led by Northern Gritstone

THE PAIN

A CISO and a procurement team aren't looking for what it does. They're looking for what could go wrong, who else has already done it, and whether anyone gets fired. Mid-market decks answer the right questions in the wrong order.

LINKEDIN NOTE (221 / 300 characters)

"Congrats on the round, and on saying plainly it's for moving upmarket. Worth knowing: a CISO reads a deck for procurement risk, not features. Mid market decks rarely survive that jump. Want a second pair of eyes on yours?"

FOLLOW-UP (day +3, email or DM)

Hi Ben,

Congratulations on the round with Northern Gritstone.

You've said the money is for moving upmarket, so you may already be bumping into this. A CISO and a procurement team read a deck completely differently from a mid market buyer. They're not looking for what it does. They're looking for what could go wrong, who else has already done it, and whether anybody gets fired.

Decks built for the earlier motion tend not to survive that jump. Not because they're bad. They answer the right questions in the wrong order, and enterprise buyers stop reading before you get to the good part.

Worth fifteen minutes on what's going out at the moment?

52 · Alloy Robotics

Reach LinkedIn search · Sydney, moving into the US · \$8M Seed, 11 August 2026, led by Square Peg

THE PAIN

Everything that carried them in Australia resets at the border. Nobody's heard of them, nobody owes them an intro. What crosses over is the document, and their reader is a robotics engineer, roughly the least marketing tolerant audience alive.

LINKEDIN NOTE (215 / 300 characters)

"\$8M and a move from Sydney to the States. Congrats. Reputation and warm intros don't clear customs. The document does. And robotics engineers shut anything that smells like a brochure. Worth sorting before you land?"

FOLLOW-UP (day +3, email or DM)

Hi [name],

Congratulations on the \$8M with Square Peg.

Expanding out of Australia has one brutal quirk. Everything that carried you at home resets at the border. Nobody's heard of you, nobody owes you an intro, nobody knows the founders.

What crosses over is the document.

And your reader is a robotics engineer, which is about the least marketing tolerant audience on earth. Anything that sounds like a brochure gets closed in four seconds.

What works on them looks closer to a technical brief with real telemetry in it than a startup pitch. Fewer adjectives, more logs.

That's the version I'd build.

56 · Inevitable AI Group

Reach LinkedIn search · Tel Aviv · \$6M Pre-seed, August 2026

THE PAIN

Most companies need a deck twice a year. A studio needs one every time it launches, which means the deck isn't the expensive part. Rebuilding the same wheel with every founder they back is, slightly worse each time because everyone's in a rush. Your best repeat customer on the whole list.

LINKEDIN NOTE (188 / 300 characters)

"Most companies need a deck twice a year. A studio needs one every time it launches, forever. Solving that once as a kit beats solving it eleven separate times. How would you want it built?"

FOLLOW-UP (day +3, email or DM)

Hi [name],

Congratulations on the \$6M.

Most companies need a deck once or twice a year. You need one every time you launch something. So the deck isn't really the cost. Rebuilding the same wheel with every solo founder you back is, slightly worse each time because everybody's in a hurry.

The version that scales is a kit. A narrative structure and a design system every new company inherits on day one, so their first deck starts at decent instead of blank.

Build it once. Use it for years.

That's the conversation I'd like to have.

57 • BioScout

Reach Founder and CEO Dr. Lewis Collins · LinkedIn search · Sydney · A\$6.75M Seed, August 2026 · Going from 250 sensors to 1,000, and into Europe and Brazil

THE PAIN

Scaling sensors is an operations job. Getting into Europe and Brazil is a communication job. Growers want the yield case in their crop, their language and their units, and an Australian case study reads as somebody else's farm in somebody else's weather.

LINKEDIN NOTE (228 / 300 characters)

"Congrats on the raise. 250 sensors to 1,000, plus Europe and Brazil. A grower in Bahia isn't going to read a Sydney deck. Different crop, different units, someone else's weather. That translation is the boring half of expansion."

FOLLOW-UP (day +3, email or DM)

Hi Lewis,

Congratulations on the round, and on getting Hort Innovation and GrainCorp behind you. That's credibility you can't buy in agriculture.

Two very different things are about to happen though, and it's worth keeping them apart.

Going from 250 sensors to 1,000 is an operations job.

Getting into Europe and Brazil is a communication job.

Growers are practical people. They want the yield case in their crop, their language and their units. An Australian case study reads to them as somebody else's farm in somebody else's weather, and it doesn't matter how good the science underneath it is.

That's a specific piece of work, and far easier before a season than halfway through one.

69 · Decile Group and VC Lab

Reach LinkedIn search · Remote · 34 active Fund I, II and III vehicles, \$280M+ between them

THE PAIN

Their whole cohort is raising into the tightest LP market in a decade, and most first time GPs build the LP deck like a startup deck. Vision up front, proof later. LPs read in the opposite order and have usually decided by slide four.

LINKEDIN NOTE (219 / 300 characters)

"177 emerging manager funds closed this year, fewest since 2015. Most first time GPs build the LP deck like a startup deck. Vision first, proof later. LPs read it the other way round. Curious what your cohort is sending."

FOLLOW-UP (day +3, email or DM)

Hi [name],

177 emerging manager funds closed in the year to 2026. Fewest since 2015. Median US fund down to around \$15M.

Your cohort is raising into the tightest LP market in a decade, which means the deck is doing more work than it has in years.

Most first time GPs build it like a startup deck. Vision up front, proof somewhere later. Institutional LPs read in the opposite order. Track record, thesis discipline, why you specifically, then everything else. If those aren't in the first few slides they've already made up their mind.

That's a structural fix rather than a design one, and it applies to every manager in your programme at once.

Happy to do one teardown free so you can see whether it's worth putting in front of them.

[link]

77 · RSAC Conference

Reach rsaconference.com/about/sponsorship-opportunities, where reps are split by company name, A to F, G to R, S to Z · LinkedIn search · RSAC 2027 runs 5 to 8 April at Moscone

THE PAIN

The prospectus has a harder job than it looks. It's competing for the same budget line as four other security conferences, all claiming great audiences. And almost nobody builds the post event recap that decides renewal.

LINKEDIN NOTE (216 / 300 characters)

"RSAC 2027 sponsorship is open, so vendors are allocating now and locked for the year after. That prospectus is fighting four other security shows for one budget line. Worth strengthening while they're still deciding?"

FOLLOW-UP (day +3, email or DM)

Hi [name],

Sponsorship for April 2027 is open, which means vendors are carving up budget over the next few months and then shut for the year.

A prospectus has a harder job than it looks. It isn't really describing your event. It's competing for the same budget line as four other security conferences, most of which will also promise a great audience and great visibility.

The ones that win read like a business case. Who's actually in the room, what proof you've got, and what the sponsor walks away holding. The ones that don't read like a menu with tiers on it.

There's also the thing almost nobody bothers building. The post event recap that decides whether they come back next year. That one is usually a screenshot of a dashboard and an apology.

Either of those is worth a conversation.

78 · NHIA, the National Home Infusion Association

Reach Andrea Schermerhorn, Sr. Sales Manager, nhia@discoversb.com, (301) 658-2042 · Conference site · 2026 hall sold out, 2027 booths not on sale yet

THE PAIN

Selling out usually means the floor was priced or packaged below what the market would pay. The standard reaction is to change the dates on last year's prospectus and run it again, which leaves that money sitting there for another year.

LINKEDIN NOTE (226 / 300 characters)

"Congratulations on selling out the 2026 hall. Selling out is usually a pricing signal, not just a good year. Most shows answer it by reprinting last year's prospectus with new dates. Worth doing better before 2027 booths open?"

FOLLOW-UP (day +3, email or DM)

Hi Andrea,

Congratulations on selling out the 2026 exhibit hall. Good problem, and a rare one.

It's also a signal. Selling out usually means the floor was priced or packaged below what the market would happily pay. The standard reaction is to change the dates on last year's prospectus and run it again, which quietly leaves that money on the table for another twelve months.

The other option is a 2027 prospectus built to sell up. Clearer tiers, a genuine premium option at the top, and the sold out story used as proof rather than a line in the intro.

Small project, fairly direct answer in revenue.

Worth fifteen minutes before booths go on sale?

87 · FaZe Clan

Reach LinkedIn search · Head of Partnerships or CRO · Out of the EWC 2026 Club Partner Programme since around April

THE PAIN

A brand marketer isn't buying trophies or roster history. They have a campaign to run and a CMO to explain it to. Most esports decks are still written for fans and now sit in the same inbox as decks from traditional sports properties chasing the same money.

LINKEDIN NOTE (208 / 300 characters)

"The 2026 partner programme reshuffled and the money now sits with non endemic brands, who read a deck like marketers rather than fans. Most esports decks still talk to fans. Curious what yours currently says."

FOLLOW-UP (day +3, email or DM)

Hi [name],

With the 2026 partner programme changes, more of the revenue has to come straight from brands now. And the brands holding budget in esports these days are mostly non endemic.

That changes the job of the deck completely.

A brand marketer isn't buying trophies or roster history. They've got a campaign to run and a CMO to explain it to. They want a defined audience, attention they can't buy cheaper somewhere else, and a mechanic they can describe internally in one sentence.

Most esports sales decks are still written for fans. Loud, beautiful, full of moments. And they're now landing in the same inbox as decks from traditional sports properties going after the same money.

I'll rebuild one section and show you the difference, before you commit to anything.

[link]

88 · Karmine Corp

Reach LinkedIn search · France · Head of Partnerships · Out of the EWC 2026 Club Partner Programme

THE PAIN

They have the thing most properties would pay to borrow, a fanbase that genuinely turns up. The gap is translation. Everyone inside esports understands what KC means. A brand marketer in Paris or Munich doesn't, and needs it in their own terms before it reaches a budget holder.

LINKEDIN NOTE (225 / 300 characters)

"One of the biggest fanbases in European esports, now having to convert straight into brand money. Non endemic marketers buy audience data, not passion, and they buy it in their own language. Curious what's in yours right now."

FOLLOW-UP (day +3, email or DM)

Hi [name],

With the 2026 programme changes, more of the revenue now has to come directly from brand partners.

You've got the thing most properties would pay to borrow. A fanbase that genuinely turns up.

The gap is usually translation. Everyone inside esports understands what KC means. A brand marketer in Paris or Munich doesn't, and they need it in their terms before they'll take it anywhere near a budget holder.

In practice that means audience data before roster, campaign mechanics before culture, and a version in each language that reads like it was written there rather than run through a translator.

I'd start with one deck and one pager and see how it lands.

[link]

89 • LOUD

Reach LinkedIn search • Brazil • Head of Partnerships • Out of the EWC 2026 Club Partner Programme

THE PAIN

Creator reach is genuinely hard to show. It's spread across a lot of people and a lot of platforms, and most decks give up and put a wall of logos on a slide, which proves nothing to a brand.

LINKEDIN NOTE (221 / 300 characters)

"Brazil's biggest esports audience is creator led, which is exactly what non endemic brands want and exactly what most decks fail to prove. A wall of logos isn't an audience. I could show you the difference on one section."

FOLLOW-UP (day +3, email or DM)

Hi [name],

With the partner programme reshuffled for 2026, the commercial deck has to work harder than it used to.

LOUD's real asset was never the roster. It's a creator led audience with reach most Brazilian media companies would struggle to match, which happens to be exactly what non endemic brands are shopping for right now.

The trouble is that creator reach is genuinely hard to show. It's spread across a lot of people and a lot of platforms, and most decks give up and put a wall of logos on a slide, which proves nothing.

Turning that into one clear picture, in Portuguese and English, is the actual job.

I'll do a section as proof first, so you're not committing to anything.

[link]
